

Auditorium

Seating

Affordable comfort combined with contemporary design.

Patterson Lecture Hall

*You make the Rules
We make the Rest...*

Tawes Recital Hall

Wood Back

Harmonized wood back panels offer a warm, refined aesthetic appearance.

End Panels & Arm Caps

Dress up aisle end panels and arm caps with wood, steel, laminate or plastic inserts. Optional cup holders, aisle light and row markers are also available.

Large Tablet Arm

Strong, oversized tablet arms are specifically designed to accommodate laptop computer use. The large tablet arm measures a generous 11-1/2" x 15-1/4". A one-motion return mechanism automatically returns oversized tablet arms to a stored position when not in use. A medium tablet measuring 10-1/2" x 13-3/4" is also available.

Acoustical Seat Pan

Optional acoustical seat pans are perforated to optimize acoustics in performance auditoriums. Paired with an internal layer of sound-absorbing foam, acoustical seat pans enrich the sound and augment the audience's listening pleasure.

Discrete Power/Data Access

Users plug into easily accessible power and data modules mounted below seat armrests. Power/data option is available with either wood or polypropylene back panels. However, when power/data is specified, only plastic armrests and plastic end panel inserts can be selected.

Dual Tubular Uprights

For a more contemporary look and improved air circulation, select dual steel tubular uprights without end panel inserts.

Hardwired Power Infeeds

Providing inconspicuous power for up to 24 seats per row, hardwired power infeeds enter on the inside of any upright. Built-in power and data eliminates searching for outlets in floors or walls, and requires no additional installation space.

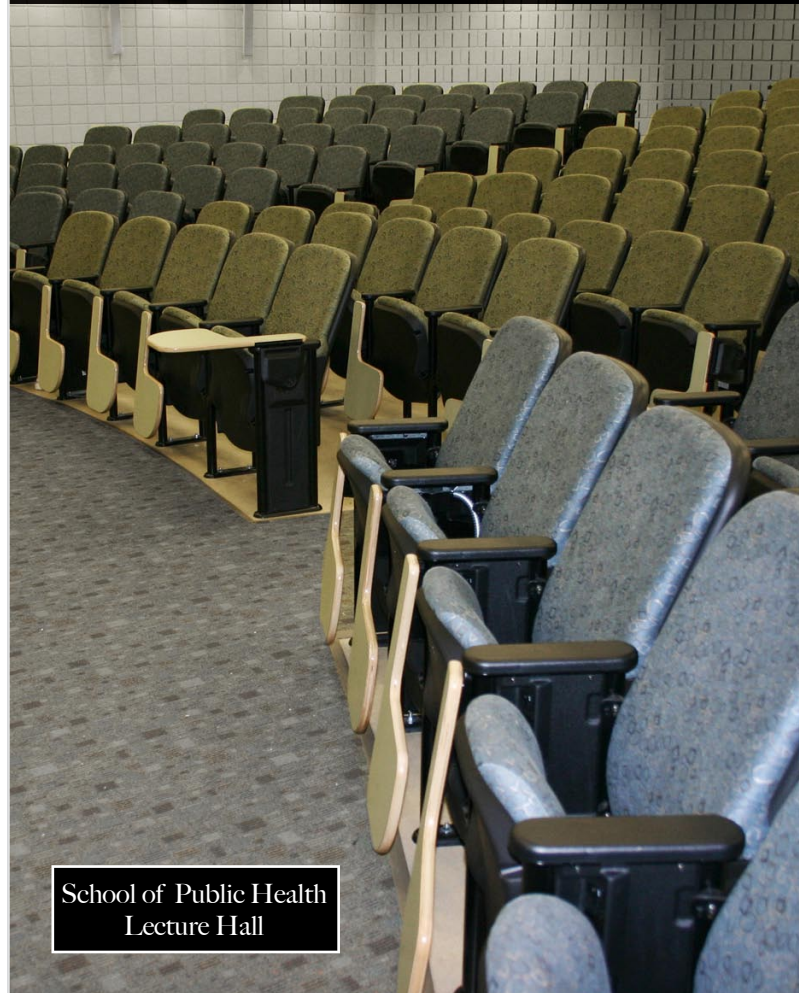

Quick Connect Power

Installation of power is swift and easy with quick-connect power distribution harnesses. Improve the auditorium's appearance with plastic shrouds that conceal power and data cables between seats.

WE KNOW WHAT YOU WANT

and giving you the choice.

*Custom made
with you in mind...*

We can provide amenities to fit any custom design including ADA code requirements.

Create a lasting and positive impression with seating that enhances the appearance of your auditorium and builds the image of your institution.

We can offer innovative technology support, contoured comfort, space efficiency and a fresh, contemporary design - all at a surprisingly low price.

University of Maryland at College Park Project Specifications:

Patterson Lecture Hall

- Each row is powered with quick-connect distribution harnesses
- Each seat accommodates power/data access
- Acoustical seat pan
- Large tablet arm

Tawes Recital Hall

- Maple shells on seat backs, aisle end panels, and arm caps
- Medium tablet arm

School of Public Health Lecture Hall

- Optional choice of power in rows or each seat
- Fixed tables to accommodate power and ADA code requirements
- Medium tablet arm
